# Our Projects

## SMP Projects

SMP is a key project implemented by the Saudi government to reach the goal of energy conservation and emission reduction under "Vision 2030". It is the biggest smart meter project in the world in one time deployment (approximately 10 million smart meters deployed in 15 months). It is also the world's first smart meter project with the largest deployment of two advanced communication solutions, NB-IoT and Hybrid (RF&G3), leading the new trend of smart metering in MENA, and around the world.

## Smart Meter and meter box maintenance

We have begun installing smart meters on homes and businesses as part of our smart meter program in New Jersey. While installing smart meters, it is possible that our installation vendor may find a component of the electrical system is deteriorated and requires the customer's attention.

## Smart Meter and modem Upgradation and Communication

Smart meters are a significant part of the future of energy. They provide real time data on usage to both utilities and end users, helping people monitor energy usage, helping water utilities detect leaks, and eliminating meter reading visits.

**" We are Building the Future and Restoring The Past "**
